RFID

3M™ Kiosk SelfCheck™ System

The 3MTM Kiosk SelfCheckTM System has been specifically designed to allow libraries to enjoy all the benefits of a 3M RFID SelfCheck system - self-issue, return and renew functionality – within a compact, kiosk footprint.

With its multiple-item checkout/in/renew feature, easy-to-use interface and unique colour changing RFID ledge, customers can enjoy easy workflow (place keys, bags etc on the shelf, whilst multiple books are simply placed on the RFID reader area) and staff can be sure items are checked out and returned correctly. In addition, web-based remote monitoring and diagnostic software ensure troubleshooting and obtaining system statistics has never been easier.

Innovative Design

- Unique RFID ledge ensures customer enjoys easy workflow
- High resolution LCD touchscreen
- Colour changing RFID reader pad select from 1 of 4 colours
- Choose from wide range of kiosk colours to perfectly suit your library

Reliable Checkout
